EftTerminalStatus messages

In this page we present all the Status Codes which can be sent on the EftTerminalStatus messages.

We support 4 different types of Terminal Status messages:

- Display status messages
- Card Status Messages
- Power Status Messages
- Information Status Codes

Display status messages

These messages are sent when a display is shown on terminal. They are marked as status type "D" (Display).

Card Status Messages

These messages are sent when the card status changes on terminal. They are marked as status type "C" (Card).

Status Type	Status Code
Card inserted	200
Card removed	201
Card swiped	202
Card not present	203
Card manually entered	204
Card data accepted	205
Card data not accepted	206
Card data error	207
Card cancelled	208
Card timeout	209
Card reading started	210
Card presented	211

Power Status Messages

These messages are sent when the integrator requests the power information to the terminal. They are marked as status type "P" (Power).

Woken Up message is sent when the terminal awakes after being in sleep mode.

Description	Status Code
Power on	300
Power off	301
Woken up	302

Information Status Codes

These messages are sent when the terminal starts or the integrator requests the terminal information (400), or when the terminal languages gets changed (401), these are always sent as status type "I" (Info).

Description	Status Code
Terminal information	400
Language changed	401
